-About

“Cloned Trader is an AI software development firm headquartered in Dubai, offering an automated connectivity service for Forex and Crypto. Our platform enables traders and users to seamlessly integrate the system and automatically connect with their clients—all without holding or safeguarding funds.”

AI ALGORITHMIC TRADING SYSTEM

Our automated and customized artificial intelligence (AI) is designed to meet investment needs in three categories, adapting to each client's profile and objectives.

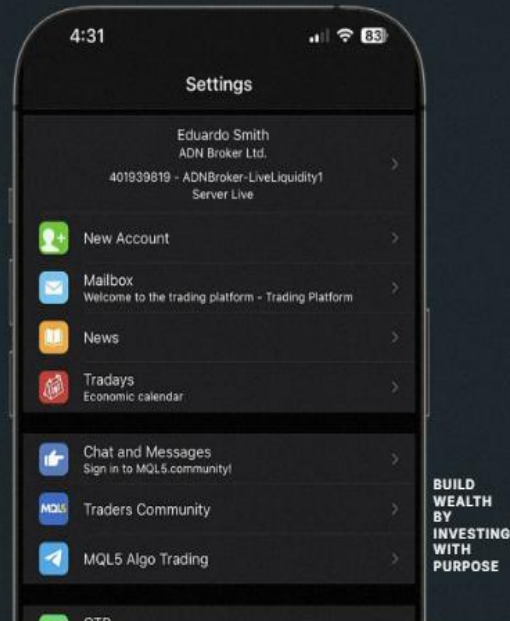

PROBLEMS THAT OUR SYSTEM SOLVES FOR YOU

 Execution speed

 Neutral emotions

 Data analysis

 Autonomy

AI Forex

AI Forex is an automated AI service for forex trading. Users add their account, password, and server to the Cloned Trader service.

We allow you to connect the exact number of accounts you need, whether it's 2, 3, or 3,000..

AI Crypto

AI Crypto is an automated AI service for cryptocurrency exchanges. Users add their API key, secret key, and trading password to the Cloned Trader service.

Security, reliability and performance is our main focus, this allows us to not only have the safest trade copier, but also the fastest.

Team

ALEJANDRO HERNÁNDEZ

HEAD OF DEVELOPMENT

Alejandro Hernández is a blockchain and smart contract expert whose ability to develop innovative solutions has been crucial to the evolution of Waynance. His mastery of Solidity allows him to create secure and efficient smart contracts, while his extensive experience in digital certification ensures the integrity and authenticity of transactions. Alejandro has played an essential role in designing the blockchain-based payment infrastructure, driving technology into a new era of digital transactions.

LUIS YANEZ

DEVELOPMENT ENGINEER

Luis Yanez stands out for his deep understanding of Web3 and deep learning, areas that are fundamental to the advanced functioning of Waynance. His knowledge of neural networks and advanced computing has enabled the effective integration of intelligent algorithms into the platform. Luis has been key in implementing emerging technologies that enhance Waynance's ability to offer fast and secure blockchain payments, transforming how digital transactions are conducted.

JUAN ANGEL

DEVELOPER

Juan Ángel Soria combines his experience in Solidity and blockchain with a deep knowledge of smart contracts to optimize the Waynance platform. His ability to develop and audit smart contracts ensures a robust and reliable payment ecosystem. Juan Ángel has been instrumental in integrating digital certification into processes, ensuring that every transaction is secure and transparent in the blockchain environment.

KOSTYANTYN

AI ENGINEER

Kostyantyn brings extensive knowledge in computing, deep learning, and neural networks, which has been vital to Waynance's technological evolution. His ability to apply advanced algorithms in the development of blockchain infrastructure has allowed Waynance to offer a more efficient and sophisticated payment system. Kostyantyn excels at merging theory with practice, facilitating the transition to a new era of digital payments.

RAFAEL GARNERO

LAWYER

A distinguished blockchain specialist, Rafael brings deep expertise in ensuring legal compliance and regulatory adherence in projects involving cryptocurrencies and smart contracts. His extensive experience in blockchain regulation guarantees that every aspect of the project aligns with current legal requirements, providing a solid and secure foundation for implementing innovative solutions in the digital world.

XAVIER BALDÓ

TRADER

As the International Sales Director, Xavier leads the global commercial strategy with a strategic vision that drives growth and expansion in international markets. His experience in global sales management ensures that the project is effectively positioned and adapted across different regions of the world. Xavier is crucial in creating robust sales networks and identifying business opportunities, facilitating the penetration of new markets and increasing the project's international presence.

MANUEL BEIRO

TRADER

Manuel Beiro is a passionate cryptocurrency trader focused on the innovation of blockchain technology and digital finance. With years of experience in the crypto markets, he specializes in identifying both short- and long-term investment opportunities in assets such as Bitcoin, Ethereum, and emerging tokens. His approach is grounded in rigorous technical and fundamental analysis, combined with a strong risk management strategy.

JAVIER BEIRO

TRADER

Javier Beiro is an expert in the foreign exchange (Forex) market, with extensive experience analyzing trends and interpreting macroeconomic indicators. His method combines fundamental and technical analysis to identify price movements with precision and maximize trading profitability. In addition to his work as a trader, Javier mentors novice investors, sharing his expertise in risk management and entry/exit strategies.

Trading Strategy

The strategy consists of 3 parts and 7 different trading systems. The 3 parts are defined in:

Money management

Identification of the capital provided and customer requirements. Based on the requests, the existing capital is prepared by applying mathematics appropriate to the expectations.

Risk management

After identifying the available capital to operate, the risk management is prepared to accept an adequate Risk-Benefit-Ratio and to be constant in the % of profit based on the Backtesting of the last 7 years.

Operation and execution

Finally, we structure which of the 7 existing strategies will be applied and combined for the client and in which quantities, since each system is designed for different risk management, different market situations and different profit purposes.

How does it works?

- 1**
Market Search
Our traders constantly search the market, both manually and with AI indicators to find the currencies with the highest probability of volatility and market liquidity **Only for SPOT Trading**.
- 2**
Backtesting
Once these are found, they go through an exhaustive study of Backtesting applying the strategies to identify and justify the probabilities of success in the operation with that particular currency and Pair.
- 3**
Signal Identification
At the end of this manual work, Tetris is connected to start the search for market entry options in different timeframes: Scalping, Swing and Holder.
- 4**
Final Verification
With the signals identified, the alerts are activated with human supervision and sent to the last filter which is the CPD, where an IA system supervise the arrival of the orders, giving this last filter the ok to finally send them to the exchange.

How to use it?

The use of this system is another difference in the market. Thanks to our commercial agreements with Bitget and Binance, we get 2 fundamental aspects to operate:

Preferential Market Entry

Preferential entry upon arrival of our order to the book.

Reduced Latency

Fast API to activate TRADE faster than others

These 2 points allow us to have the difference of being able to operate from our system directly in the client's account without having the custody of their funds or authorization of movements but only to operate.

To be able to use it, the client must develop an API directly in his personal Bitget or Binance account and provide this API to the team. Once the capital is deposited. Tetris will start sending both buy and close trades and make the necessary currency pair changes without any support from the client.

**WITHDRAW
WHENEVER
YOU LIKE**

Just make sure all trades are closed, and that's it! You can request a withdrawal of your profits immediately.

Fees to use the IA

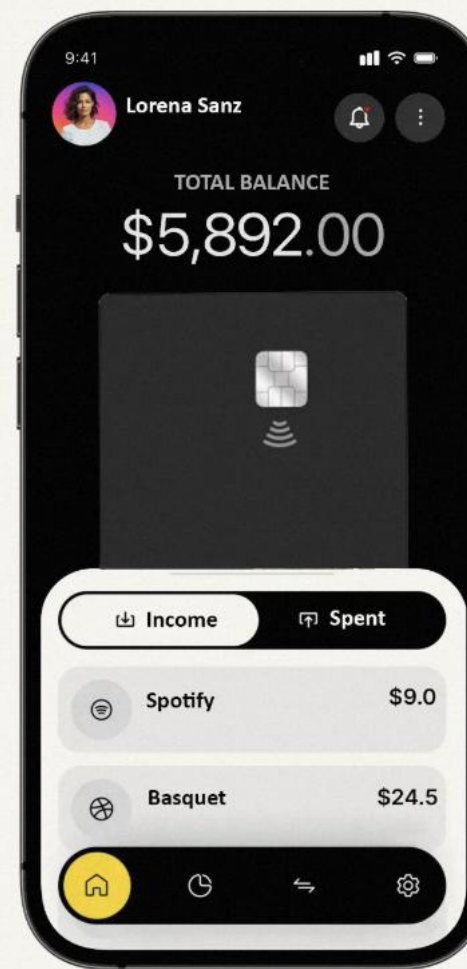

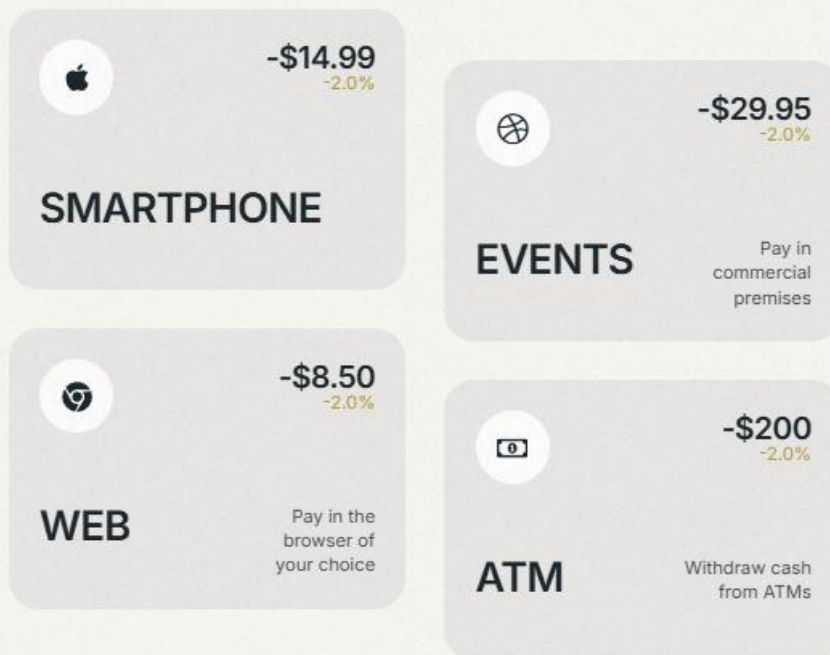

30%

Monthly invoice issued by ClonedTrader of the profit generated

The company Tetris issues a monthly invoice of 30% of the profit generated to the client, which must be paid within 5 working days after issuing the invoice. Forex AI fees will be 30%. Crypto AI fees will be 40%.

USE YOUR EARNINGS WITH YOUR CARD

With **ClonedTrader**, your profits are transformed into cash you can use at any time thanks to our, **Black Visa card**. Pay online, shop in stores, withdraw cash at ATMs, and access your capital from any payment point around the world. More than a trading service, we are the gateway to the freedom of using what belongs to you instantly and easily, bringing you one step closer to the life you've always wanted.
